**Notes**

\*Bentley vehicles that run on VW/Audi electronics offer a similar module selection to the Audi A8 and VW Phaeton, including the W12 engine.

\*\*VAD's OBD-II module will offer emissions-related data, featuring live and freeze frame data, and faults from the engine and transmission only.

\*\*\*Some 2010 Bentley cars have not been fully tested with the VAD tools. Even though these cars have VW/Audi electronics, the degree of compatibility is not yet known.
