

# VAD Pro-901 Print Module IrDA Printer Compatibility

VAD has 3 IrDA adapters available to customers wishing to print wirelessly from the VAD Pro-901 to an equipped laser printer. They are:

## STS-301

- connects to the parallel port of a compatible laser printer
- works as a pass-through, no extra cable required
- will allow switching between IrDA and conventional printing methods
- LED's to indicate transmission speed and printing status
- requires AC connection via wall adapter

## STS-300

- connects to the parallel port of a compatible laser printer; no pass-through, printer must be additionally connected via serial, USB, or fire wire
- no external power required
- will allow for co-existing IrDA and conventional printing methods

## STS-302

- connects to the USB port of a compatible laser printer
- requires AC connection via wall adapter or (4) AAA batteries
- will allow for co-existing IrDA and conventional printing methods
